

19 April 2021

**SulNOx Group Plc (the "Company" or "SulNOx")**

**Designation into the Apex Segment of the AQSE Growth Market**

(Aquis Stock Exchange: SNOX)

The SulNOx Group offers an immediate and tangible step towards Carbon Neutrality for all hydrocarbon users – 11 billion litres of fuel each and every day. The proprietary green technologies improve combustion to lower toxic emissions, improving air quality whilst simultaneously reduce fuel and maintenance costs.

Today, SulNOx becomes the 21<sup>st</sup> stock to have met the criteria and proudly join the other Apex companies.

Ben Richardson the COO of the SulNOx Group commented, *"SulNOx is focused on bringing the company's "de-carbonising" patent pending products to a world that needs to address the global warming and climate change crisis, not by 2050 but right now in 2021. SulNOx are making great strides forward with our clients but very few potential investors are aware of our existence. Our move up to the Apex Segment will change this situation in the weeks and months ahead. The Apex Segment also brings an increased number of market makers who are incentivised to improve the liquidity of our stock on the exchange.*

*We are the 21<sup>st</sup> company to qualify for the Apex Segment and it is undoubtedly a coming of age for our business. Every day we are approached by companies and individuals who have seen what our unique technology can do for them. Today's move to the Apex Segment will allow more potential investors to see our "net-zero enabling" company as a potential vaccine for climate change. We truly thank our loyal shareholders for their support in recent years and now look forward to sharing our exciting green, debt-free company with a much wider audience for the benefit of everyone."*

**Alasdair Haynes, CEO of Aquis Exchange PLC, said:** *"We are very pleased to see SulNOx move up from the Access to the Apex Segment of the AQSE Growth Market. SulNOx is doing important work to reduce environmental pollution and we welcome a stock with such strong ESG credentials to Apex. By joining the top tier of our growth market, SulNOx will be able to benefit from schemes we have in place to reduce spreads and boost liquidity and will gain greater exposure to both private and institutional investors."*
