

Taking you further, faster and cleaner

“The energy transition solution making an immediate impact on emissions and fossil fuel consumption”

- ✓ All natural, biodegradable fuel emulsifiers and conditioners
- ✓ Optimizing combustion to reduce emissions and fuel consumption
- ✓ All-in-one solution – adding stability, detergency, lubricity and power
- ✓ Unlike other products – no waste fossil fuels, or damaging metals
- ✓ Energy Transition solution for world’s biggest liquid hydrocarbon users

SulNOx Products:

1. SulNOxEco™ Fuel Conditioners:

Enhancing all gasoline, diesel, biofuels, heating oils and lighter marine fuels

2. Berol® 6446 HFO Emulsifier:

Reduced emissions and costs for all heavy fuel oils

3. Oil Reclaimers:

Turning costly watery “slops waste” into enhanced profitable fuels

SulNOx Benefits / Unique Selling Points:

Cost Savings: Compelling ROIs c.1,000%

- Reduced fuel consumption c. 8-10%
- Reduction in fuel storage costs (↓ diesel bug)
- Potential for carbon credits

Improved Engine Performance & Health:

- Reduction in maintenance costs c. 2% from ↓ DEF, ↓ load on DPF & ↓ filter changes
- Detergents and surfactants increase fuel lubricity, reducing engine wear
- Reduces soot load on EGR and protecting oil from ↓ blow-by soot

Emission Reductions / Air Quality Improvements:

- Particulate Matter Reductions (PM 2.5 ↓ >60%, PM 10 ↓ >50%)
- Greenhouse Gas Reductions

Achieve ESG Goals – both in-house and client/supply chain

- Consume less fossil fuels, scope 1, 2, & 3 / TCFD / regulatory reporting

Enhance Green Credentials:

- Retain or win new client business

Diverse Industry Usage:

- Green fuels for distribution
- Fuel storage
- Transportation
- Shipping and marine
- Waste and recycling
- Government and defence
- Mining/natural resources
- Generators
- Power stations
- Other – including agriculture, forestry and construction
